

# Publish a Website on GitHub

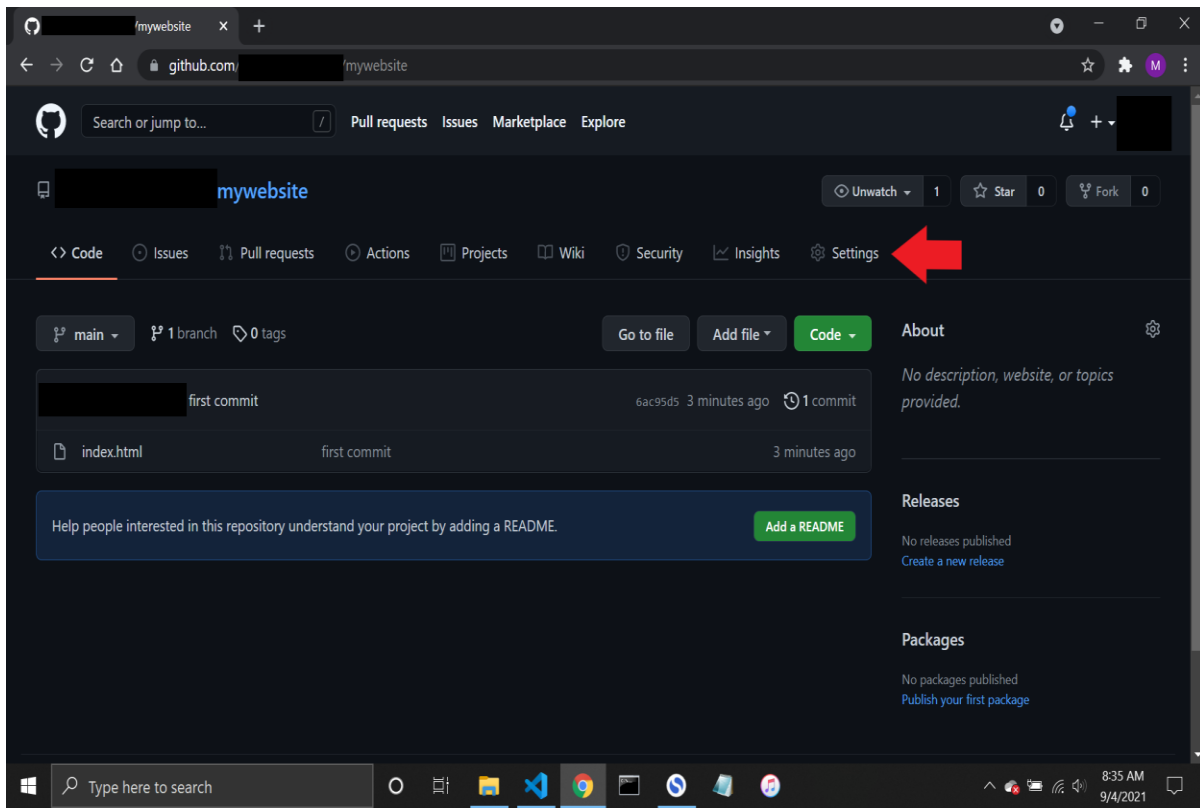

GitHub is a platform for managing project source code by storing and tracking the codes. It also enables you to publish your HTML website

✂ You must set the GitHub repository to “public” to publish your website.

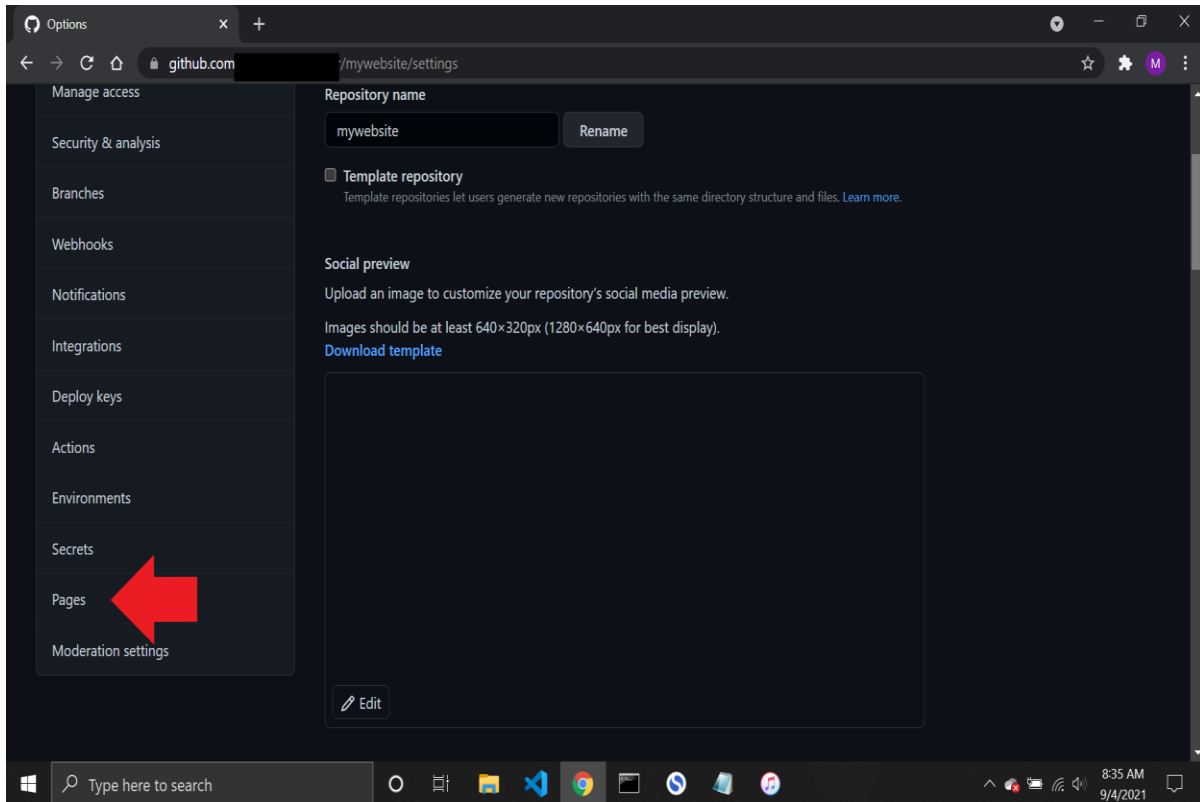

## Step 1: Go to your website's repository

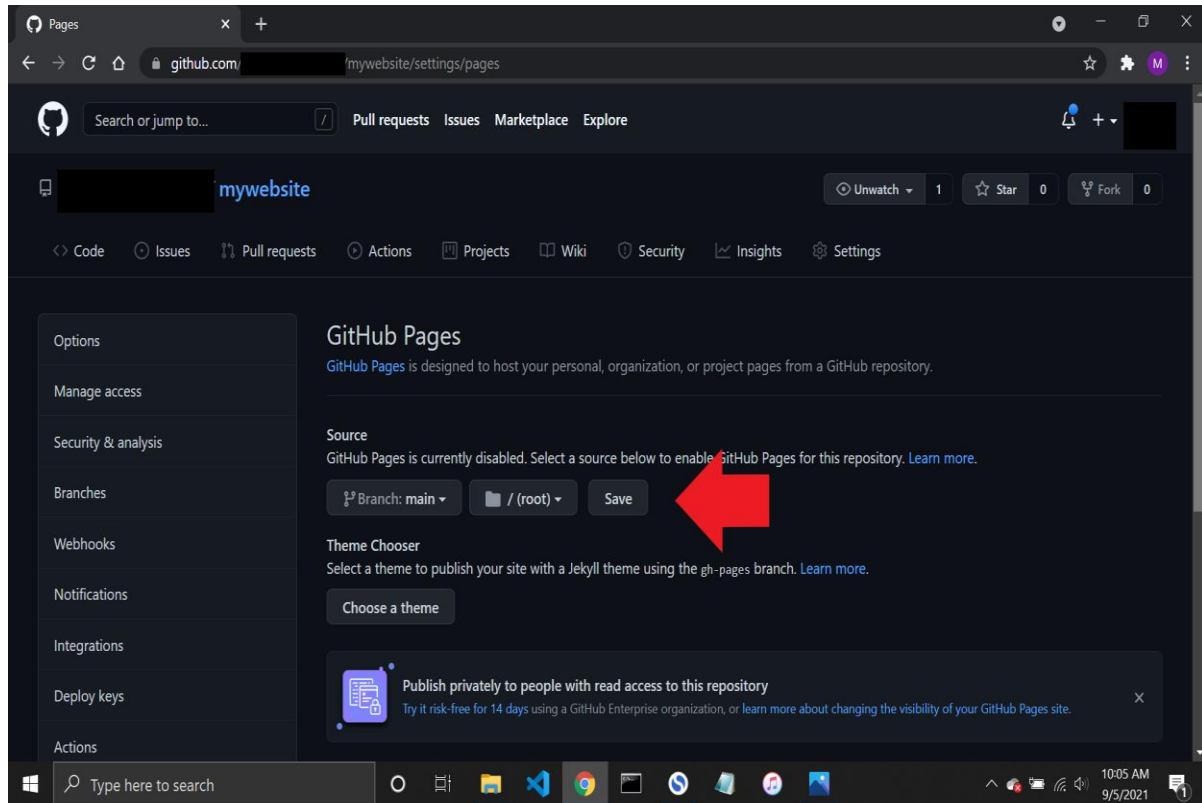

## Step 2: Select the settings

## Step 3: Go to GitHub Pages

## Step 4: Select the branch

## Step 5: Check published
